WORK EXPERIENCE

Frontend Engineer

HealthPlix Technologies

Bengaluru

July'22 - Present

- Contributed to frontend delivery for **HALO AI Summarization and Dictation**, integrating OpenAI workflows with **Server-Sent Events**, live parsing, and resilient state synchronization for IPD/OPD documentation.
- Stabilized revenue-critical IPD/OPD billing by resolving **90% of revenue leakage cases** across ad performance, deposit calculations, and payment-split regressions.
- Drove **TypeScript** and **Zustand** modernization by unifying Patient Popup across OPD and Lab modules, reducing duplicated logic and improving long-term maintainability.
- Migrated reusable UI patterns toward **Shadcn** and **Tailwind CSS**, improving frontend consistency, developer velocity, and component quality across teams.
- Implemented **Sentry observability** with production-first monitoring practices, helping shift critical journeys from reactive debugging to proactive issue detection.
- Standardized frontend delivery practices by incorporating Brownbag learnings into FE repositories and UI dev kit patterns, raising code quality across reusable modules.
- Improved release reliability in a hybrid PHP/React environment by establishing cross-repository parity checks for shared workflows before deployment.
- Contributed to **Watermelon DB offline storage**, **Amplitude analytics**, and mentored engineers on frontend architecture, TypeScript adoption, state management, and feature delivery.

Data Science Intern

Aramex India Pvt Ltd

Mumbai

Aug'21 - Jan'22

- Improved last-mile delivery performance in Bahrain by refining address extraction, preprocessing, and feature engineering for delivery-point mapping.
- Developed a block and road-number mapping model that increased address precision from **90%** to **99%**, leading to a full-time role offer.

EDUCATIONAL QUALIFICATIONS

B.E, Electronics and Instrumentation Engineering 7.47/10.0

Birla Institute of Technology and Science, Pilani

2022

Class 12th - ISC Board

90.33%

City Montessori School, Lucknow

2018

Class 10th - ICSE Board

95%

Seth M.R. Jaipuria School, Lucknow

2016

SKILLS

Frontend: ReactJS, TypeScript, JavaScript, Zustand, Shadcn, Tailwind CSS, CSS Transforms

APIs and Realtime: REST APIs, Server-Sent Events (SSE), OpenAI APIs, Firebase, real-time UI workflows

Engineering Tools: Git, Sentry, Amplitude, Watermelon DB, Render, Netlify

Programming Languages: Python, C++, Java

SCHOLASTIC ACHIEVEMENTS

- Secured an **AIR of 8358** in IIT-JEE Mains 2018 from among 1.2 million candidates.
- Selected for Kishore Vaigyanik Protsahan Yojana Scholarship (KVPY) 2018 with an **AIR of 900**.
- Selected as one of the top 1000 candidates in UP Science Talent Search Examination and received an **INR 48,000** scholarship.
- National Top 1%** in National Standard Examinations in **Physics, Chemistry, and Astronomy** 2017-18.
- Awarded Max New York Life Igenius Scholarship 2010 with a reward of **INR 3,000**.

SELECTED PROJECTS

Portfolio Website

2026

- Personal frontend portfolio showcasing projects, experience, and profile; also used as the clickable resume-name destination.

Exploding Production Game

2026

- Codex-assisted browser game deployed on Render with polished gameplay flow, production routing, and frontend-first interaction design.

Multiplayer Game Hub

2026

- Multiplayer browser game platform using real-time game-room flows, shared entry UX, and WebSocket-style state synchronization patterns.

Snapgram - Live Demo | GitHub

Mar'24 - Apr'24

- Full-stack Instagram clone with authentication, posts, likes, comments, real-time updates, React and Tailwind CSS.

Architecture Image Matching

Mar'22 - May'22

Mentor: Prof. Kamlesh Tiwari

- Machine-learning project exploring feature extraction and visual similarity matching for architecture images.

One Shot Fingerprint Singular-Point Detector

Mar'22 - May'22

Mentor: Prof. Kamlesh Tiwari

- Computer-vision project for detecting fingerprint singular points using one-shot learning techniques.
